

Soda Lime Glass 0215 Corning Glass Slides

Soda Lime Glass
 Code No. 0215
 Used for Flint Glass Standards
 Glass commonly referred to as Type II Soda Lime Glass per
 A.S.T.M.-438 federal spec DD-G-54Ib.

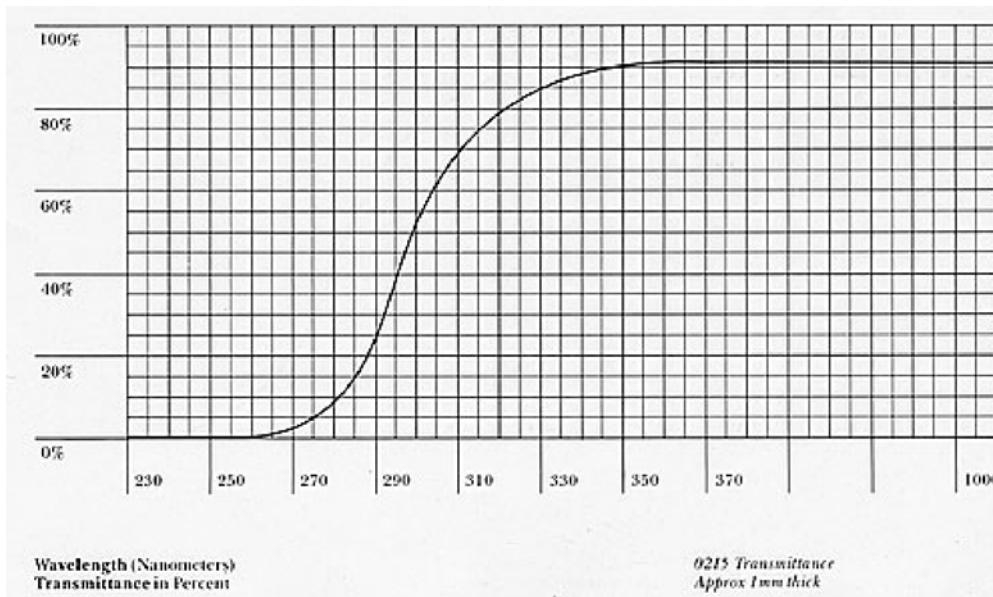

Chemical Composition

Composition	(percent approx.)
SiO ₂	73%
Na ₂ O	14%
CaO	7%
MgO	4%
Al ₂ O ₃	2%

Physical Properties

Coefficient of Expansion	89 x 10 ⁻⁷ cm/cm/°C
Strain Point	511°C
Anneal Point	545°C
Soften Point	724°C
Density	2.40g/cm ³
Youngs Mod.	Not available
Refract. Index	1.515 @ Sodium D Line

Transmittance/Wavelength for 0215 Soda Lime Glass - Approximately 1mm Thick

Applications: General purpose glass used in the container and plate glass industry.

Products: Microscope Slides and Pasteur Pipets.

Warnings: Do not use hydrofluoric or hot phosphoric acid on glass.
