**Section 4: First Aid Measures**

If accidental overexposure is suspected

General: Symptoms of poisoning may even occur after several hours; therefore, medical observation for at least 48 hour after the accident.

Eye(s) Contact: Hold eyelids apart and flush eyes with plenty of water for at least 20 minutes. Seek medical treatment. Rinse opened eye for several minutes under running water. Then consult a doctor.

Skin Contact: Remove contaminated clothing. Wash clothing before reuse. Wash with soap and water. If irritation occurs consult a doctor. Immediately wash with water and soap and rinse thoroughly.

Inhalation: If having difficulty breathing, contact emergency personnel immediately. Supply fresh air and to be sure call for a doctor. In case of unconsciousness, place patient securely on side position for transportation.

Ingestion: Induce vomiting and call for medical help. Never give anything by mouth to an unconscious person. Immediately call a doctor.

**Note to physician:** This product contains sodium carbonate at low concentrations. While no adverse complications are expected, consider endoscopy in all suspected cases of poisoning. Perform blood analysis to determine if dehydration, acidosis, or other electrolyte imbalances occurred.
