### Section 4: First Aid Measures

**If accidental overexposure is suspected**

**Eye(s) Contact:** Flush eyes immediately with water for at least 15 minutes with eyes open and eyelids raised. Remove contact lenses, if present and easy to do so. If irritation persists, get medical advice/attention.

**Skin Contact:** Contaminated clothing should be removed immediately. The affected body areas should be washed with soap and water for approximately 15 minutes. Seek medical attention if irritation develops.

**Inhalation:** The patient should be transported away from exposure and brought to fresh air. If not breathing, administer artificial respiration. If breathing is difficult, give oxygen. Call a POISON CENTER or doctor/physician if you feel unwell.

**Ingestion:** If the patient is conscious, wash out mouth with water and have the patient drink a glass of water or milk to dilute the material. Transport to the hospital for care.
