Section 4: First Aid Measures
If accidental overexposure is suspected

Eye(s) Contact: Immediately rinse out thoroughly for at least 10 minutes with lids apart with plenty of clean water. If symptoms occur, consult a doctor after eye contact.

Skin Contact: Not harmful. Wash hands with soap and water after use. In case of contact with molten product cool off rapidly with cold water. Do not pull solidified product off the skin.

Inhalation: Do not breath fumes in case of fire. If overwhelmed by fumes, remove from immediate source of exposure and assure that victim is breathing. If not breathing, administer cardio-pulmonary resuscitation (CPR). If breathing is difficult, administer oxygen if available. Seek medical attention.

Section 6: Accidental Release Measures
Steps to be Taken in Case Material is Released or Spilled: NA
Waste Disposal Methods: Dispose of waste according to Federal, State and Local Regulations.

Section 7: Handling and Storage
Precautions to be taken in Handling and Storage:
Handling: Wear protective gloves to avoid cutting. Take action against electrostatic charging. Caution should be exercised if the product is heated to avoid burns due to contact with the hot material. All polymers are broken down to a certain extent at their processing temperature. This effect increases as the temperatures rises. Before the melting point is
reach, the untreated film begins to contract, the extent of the contraction depending on the time and temperature. The precise quantity and nature of the breakdown products depends on the temperature, oxygen supply and process conditions. Ensure adequate ventilation at the processing machines.

Storage: Store in a dry area/protect against moisture.
Storage temperature: <32ºC (90ºF)
Storage Pressure: NA
