Section 1: Product and Company Identification

Product Name:
Synonym:
Company Name
Ted Pella, Inc., P.O. Box 492477, Redding, CA 96049-2477

Inside USA and Canada 1-800-237-3526 (Mon-Thu. 6:00AM to 4:30PM PST; Fri 6:00AM to 4:00PM PST)
Outside USA and Canada 1-530-243-2200 (Mon-Thu. 6:00AM to 4:30PM PST; Fri 6:00AM to 4:00PM PST)

CHEMTREC USA and Canada Emergency Contact Number 1-800-424-9300 24 hours a day
CHEMTREC Outside USA and Canada Emergency Contact Number +1-703-741-5970 24 hours a day

Section 2: Hazard Identification

GHS Pictograms: Not applicable. This product is not classified according to the CLP regulation. Information concerning particular hazards for human and environment: A health risk is not expected. Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculate. Used oil may contain harmful impurities.

GHS Categories: None.
Hazard pictograms: No GHS symbol or Void
Hazard statements: Void
Precautionary statements: Void
Signal Word: No word required or Void

Health Effects:
NFPA Hazard Rating: Health: 1; Fire: 1; Reactivity: 0
HMIS® Hazard Rating: Health: 1; Fire: 1; Reactivity: 0
(0=least, 1=Slight, 2=Moderate, 3=High, 4=Extreme)

Results of PBT and vPvB assessment:
PBT: ND
vPvB: ND

Emergency overview:
Appearance: Clear liquid.
Immediate effects: Non-hazardous in bulk liquid form at low to moderate temperature. Prolong/repeated skin contact may cause irritation/dermatitis. Heating to high temperature or mechanical actions may produce fumes which may cause irritation of the breathing passages.

Potential health effects
Primary Routes of entry: ND
Signs and Symptoms of Overexposure: ND
Eyes: May cause irritation
Skin: Prolonged or repeated contact with skin may cause irritation and possible dermatitis.
Ingestion: Low toxicity on ingestion has laxative effect and is rapidly eliminated.
Inhalation: Vapor pressure is very low. Vapor inhalation under ambient conditions is normally not a problem. Inhalation of oil mist or vapors at elevated temperatures may cause respiratory irritation. Negligible breathing hazard at normal temperatures (up to 38°C/100°F) or recommended blending temperatures. Elevated temperatures or mechanical action may form vapors, mist and fumes. Inhalation of oil mist or vapors from hot oil may cause irritation to the upper respiratory tract. Oil deposits in the lung may lead to fibrosis and reduced pulmonary functions.

Chronic Exposure: ND

Chemical Listed As Carcinogen Or Potential Carcinogen: No

See Toxicological Information (Section 11)

**Potential environmental effects**

See Ecological Information (Section 12)

---

**Section 3: Composition / Information on Ingredients**

No hazardous substances or complex substances required for disclosure.

---

**Section 4: First Aid Measures**

**If accidental overexposure is suspected**

**Eye Contact:** Check for and remove any contact lenses. In case of contact with eyes, rinse immediately with plenty of water. Get medical attention if symptoms occur.

**Skin Contact:** Wash with soap and water. Get medical attention if symptoms occur.

**Inhalation:** If inhaled, remove to fresh air. If not breathing, give artificial respiration. Get medical attention if symptoms appear.

**Ingestion:** Do not induce vomiting. Never give anything by mouth to an unconscious person. Get medical attention if symptoms appear.

**Notes to physician:** No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

---

**Section 5: Fire Fighting Measures**

**Flash Point:** 247°C

**Flammable Limits:** LEL: ND  UEL: ND

**Auto-ignition point:** ND

**Fire Extinguishing Media:** Use dry chemical, CO2, water spray (fog) or foam.

**Special Fire Fighting Procedures:** Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

**Unusual Fire and Explosion Hazards:** Containers may explode if exposed to fire.

**Hazardous combustion products:** No specific data.

**DOT Class:** Not regulated.

---

**Section 6: Accidental Release Measures**

**Steps to be Taken in Case Material is Released or Spilled**

**Personal precautions:** No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see section 8).

**Environmental precautions:** Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

**Methods for cleaning up**

- **Small spill:** Stop leak if without risk. Move containers from spill area. Dispose of via a licensed waste disposal contractor.
- **Large spill:** Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with
non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Waste Disposal Methods: Dispose of waste according to Federal, State and Local Regulations.

Section 7: Handling and Storage
Handling: Put on personal protective equipment (see section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Do not breathe vapor or mist. Do not ingest. Avoid contact with eyes, skin and clothing. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
Storage: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Section 8: Exposure Controls / Personal Protection
Engineering Controls
Ventilation required: No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.
Personal Protection Equipment
Respiratory protection: A respirator is not needed under normal and intended conditions of use.
Protective gloves: Natural rubber (latex)
Skin protection: Lab coat
Eye protection: Safety glasses
Environmental exposure controls: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Exposure Guidelines
See Composition/Information on Ingredients (Section 3)

Section 9 Physical and Chemical Properties
Appearance and Physical State: Clear liquid.
Odor (threshold): Mild
Specific Gravity (H₂O=1): 0.86 g/ml
Vapor Pressure (mm Hg): <0.0001 Torr @ 25ºC
Vapor Density (air=1): ND
Percent Volatile by volume: NA
Evaporation Rate (butyl acetate=1): ND
Boiling Point: 160ºC
Freezing point / melting point: ND
pH: NA
Viscosity: 55cSt (55mm2/sec) at 40 ºC
Pour point: < -10 ºC (14 ºF)
Solubility in Water: Negligible
Section 10: Stability and Reactivity
Stability: This product is stable
Conditions to Avoid: No specific data
Materials to Avoid (Incompatibility): Oxidizing materials
Hazardous Decomposition Products: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
Hazardous Polymerization: Under normal conditions of storage and use, hazardous polymerization will not occur.

Section 11: Toxicological Information
Results of component toxicity test performed:
Sensitizer: No data available to indicate product or components may be a skin sensitizer.
Mutagenicity: No data available to indicate product or any components present at greater than 0.1% is mutagenic or genotoxic
Carcinogenicity: Not expected to cause cancer. This product meets the IP-346 criteria of <3% PAH's and is not considered a carcinogen by the International Agency for Research on Cancer.
Reproductive and Developmental Toxicity: No data available to indicate product or any components present at greater than 0.1% may cause birth defects.
Specific target organ toxicity (single exposure): Non-hazardous under Specific Target Organ Systemic Toxicity Single Exposure category
Specific target organ toxicity (repeated exposure): Non-hazardous under Specific Target Organ Systemic Toxicity Repeated category
Human experience: NA
This product does not contain any compounds listed by NTP or IARC or regulated by OSHA as a carcinogen.

Section 12: Ecological Information
Acute Aquatic ecotoxicity: Non-hazardous under Aquatic Acute Environment category.
Chronic Aquatic ecotoxicity: Non-hazardous under Aquatic Chronic Environment category.
Persistence and degradability: Biodegrades slowly.
Bioaccumulative potential: Bioconcentration may occur.
Mobility in soil: This material is expected to have essentially no mobility in soil.
Results of PBT and vPvB assessment: Not determined
Other adverse effects: No data available.

Section 13 Disposal Considerations
The generation of waste should be avoided or minimized wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
Federal, State and local laws governing disposal of materials can differ. Ensure proper disposal compliance with proper authorities before disposal.

Section 14: Transportation Information
US DOT Information: Not regulated
IATA: Not regulated
IMO: Not regulated
Marine Pollutant: No
Canadian TDG: Not regulated

Section 15: Regulatory Information
United States Federal Regulations
SARA: None of the ingredients is listed.
SARA Title III: None of the ingredients is listed.
RCRA: Not listed
TSCA: All components are listed on the TSCA public inventory
CERCLA: None of the ingredients is listed

State Regulations
California Proposition 65: None of the ingredients is listed.

International Regulations
Canada WHMIS: ND
Europe EINECS Numbers: ND

Section 16: Other Information
Label Information: See section 2
European Risk and Safety Phrases: ND
European symbols needed: ND
Canadian WHMIS Symbols: ND
