Wafer Carrier components include spider ring (pressure retention, edges or center), lid and base

ROUND, POLYPROPYLENE WAFER CARRIERS

These high quality wafer carrier trays are specifically designed for storage, transport and handling of semiconductor wafers, glass wafers or other delicate flat objects. Made from polypropylene material and available in sizes from 1" to 6" with maximum grip, minimum contact and minimum pressure. The wafer or disc carriers have a conical base to support the wafers at the edges only. The wafers are held in place and secured by a spider spring and locking cap.
